SURGICAL PATHOLOGY REPORT

Specimen

Appendix.

Gross

Received a specimen of appendix along with mesoappendix measuring 4.5 cm in length. The external surface appears shiny and shows presence of congested blood vessels. Cut-sections reveals patent lumen.

Microscopy

Sections studied shows wall of appendix. The mucosa shows focal ulceration. The submucosa shows presence of enlarged lymphoid follicles with prominent germinal centers. All the layers show mild to moderate diffuse infiltration by polymorphonuclear cells and lymphocytes. The serosa shows few congested blood vessels.

Impression

ACUTE ON CHRONIC APPENDICITIS - APPENDIX.
